
THE MAXIMUM HEIGHT OF PLANTS IV.

JOHN H. SCHAFFNER.

During the past summer a few measurements on the height of various plants were taken and those which are considerably above the size given in our manuals are recorded below. All of the plants in the list are from central and western Kansas, except three, which were measured in Ohio.

<i>Syntherisma sanguinalis</i> (L.) Dull.	5	feet
<i>Panicum capillare</i> L.	5½	"
<i>Panicum proliferum</i> Lam.	5¼	"
<i>Chaetochloa viridis</i> (L.) Scrib.	5⅓	"
<i>Bouteloua oligostachya</i> (Nutt.) Torr.	2⅔	"
<i>Atheropogon curtipendulus</i> (Mx.) Fourn.	4⅓	"
<i>Eragrostis major</i> Host.	4	"
<i>Viola rafinesquii</i> Greene—Ohio,	1¼	"
<i>Teucrium canadense</i> L.	3½	"
<i>Salvia lanceolata</i> Willd.	4	"
<i>Solanum nigrum</i> L.	5	"
<i>Solanum rostratum</i> Dunal.	4	"
<i>Linaria linaria</i> (L.) Karst, Ohio,	4½	"
<i>Iva xanthiifolia</i> (Fres.) Nutt.	13	"
<i>Xanthium speciosum</i> Kear.	8	"
<i>Boebera papposa</i> (Vent.) Rydb.	2¾	"
<i>Erechtites hieracifolia</i> (L.) Raf., Ohio,	10½	"
